Object-oriented programming

Algorithm implementation

Proactive software developer, proficient in multiple programming languages with high capacity for fast learning and effective teamwork skills.
I have over five years of experience in Android SDK, Java development, and database management.

I love coding, I like to challenge myself, innovate and create new solutions.  I believe my skills can be an asset to your team, and I will be able to share my knowledge to push the boundaries of the software.

## • Work History

2013-02 -
2018-05

### Lead Software Developer / CTO

Quesos & Quesos Panadería S.A.S

Medellín, Colombia

- Designed and implemented Android-based system to track transactions between the seller and the customers, and maintained the database.  As a result, the efficiency of operations for the company increased by 60%.

- Created and implemented a goverment compliance digital system for health and safety code regulations.  In addition, the system kept track of raw material and supply inventory to meet colombian goverment requirements.
